

Quick Reference Guide

The Masterlines

LTML – Long Term Money Line STML – Short Term Money Line	These two lines follow the money and therefore follow the price. The LTML is a longer version of the STML.	Panel 1
TL – Trend Line	This line can signal a change of direction. (It does not follow the slope of the price.)	Panel 2
SL – Scalp Line	This is the first early warning signal. It's a very sensitive indicator that determines acceleration and deceleration in the price action.	
MLP – Masterline Plus	This is the second early warning signal. It is referred to as the traffic director.	Panel 3
LTMTL – Long Term Master Trend Line STMTL – Short Term Master Trend Line	These provide a longer term view of the market similar to a 3min or 5min chart.	Panel 4

***LTML, TL, MLP and LTMTL are solid lines.
STML, SL and STMTL are dash-dot-dot lines.***

The Slopes

LTML, STML & 13 EMA Slopes	Top number- Slope of LTML LAST CLOSED bar Second number- Slope of LTML current open bar Third number- Slope of STML current open bar Fourth number- Slope of 13 EMA current open bar Fifth number- Slope of LTML MBF current open bar Bottom number- Slope of STML MBF current open bar	Panel 1
SL & TL Slope	Top number- Slope of SL current open bar Bottom number- Slope of TL current open bar	Panel 2
MLP Slope	Slope of MLP current open bar	Panel 3
STMTL & LTMTL Slopes	Top number- Slope of STMTL current open bar Middle number- Slope of LTMTL current open bar	Panel 4

The Box – Overbought/ Oversold & MLP Oscillation Lines

Panel 2 - The BOX and OB/OS

Extreme Overbought-	Dash-dot-dot line
Overbought-	Dash line
Top of BOX-	Red solid line
Bottom of BOX-	Green solid line
Oversold-	Dash line
Extreme Oversold-	Dash-dot-dot line

Panel 3 - MLP Oscillation

Top of normal MLP Oscillation-	Red dash line
Zero Line-	White dash line
Bottom of normal MLP Oscillation-	Green dash line
