

# VScalp Chunking

1. Wick of candle bounces off Swing Body
  2. Two minutes later a V forms on 13 EMA
  3. Three minutes later a 13/20 Cross occurs
  4. Six minutes later a 13/50 Cross occurs and volume spikes. No Pivot data on this chart so we don't have a "target" other than the next area of support at 9755.
- How many ticks/minutes to grab 2 or 3 ticks?  
9880 to 9860 and three minutes.

Momentum short growing even though 50 SMA does not yet agree

Wait for 13/50 cross to avoid retracement drawdown.

Did VScalp  
"Chunking" get  
you to your  
"PREDICTIVE"  
practice  
destination?
